COACHES AND HORSES,  
The Cochise Copper Mining Company  
Bisbee, Arizona.

MINES OF QUEEN AND CROWN

This company owns a very valuable  
group of mines situated in Warren  
mining district, capacity of Cochise  
mine.

mining the town of Bisbee, and ad-

joining the property of the Coop-

er Queen Consolidated Mining Company

in north part of the latter company has  
a capacity of about twenty

thousand tons of copper and

silver annually.

Reported to have been over \$2,000,000

and it has been said by experienced  
miners who have been under its con-

trol for years, that the Queen Mine

is in constant operation for the  
past twenty years without further de-

velopment.

Is it not reasonable to believe that  
the property of the Cochise company is

fully as valuable when it is within  
such close proximity to such a won-

dful mine?

The blasting of active underground

workings of the Queen property can  
easily be felt and heard at the shaft of

our mine, and oftentimes the concussion

has attracted marked attention.

The original owners of these val-

uable mines are local business men, well

and favorably known in Bisbee, and

surrounding vicinity, who are doing

their utmost to make this enterprise

a success in every respect.

The board of directors are original owners, and are

donating their services to the com-

pany until such time as the mine will

pay dividends. They own the con-

trolling interest in this property, and

are protection to stockholders have

placed their entire interest in escrow

for a term of one year.

The stock books of our company are

now open for subscriptions, and a limi-

ted number of shares are offered at

\$100.00 per share. No application

for less than 100 shares will be re-

ceived.

The company reserve the right at

any time to advance the price of shares

without further notice, or to reject any

application for stock at their discre-

tion.

Every cent received from the sale of

stock will be expended toward the de-

velopment of our property and the

erection of buildings, and all other ne-

cessary improvements, and to make our enterprise a success in every

particular.

We invite investigators and their

experts or their engineers to closely

scrutinize our property.

Applications for shares may be made

to any of the directors of the com-

pany, or to any of the legally autho-

ized representatives.

## The

## Cruel Knife!

It is absolutely useless to cut  
at a malignant tumor to cure cancer,  
or any other blood disease. The knife  
of such treatment is illustrated in the  
alarming number of deaths which result from it. This disease is in the  
blood, and hence cannot be cut out.  
Nine times out of ten the surgeon's  
knife only hastens death.
